Experience

Infosys Springboard

Feb 2026 – Apr 2026

AI Intern | [GitHub](#) | [Certificate](#)

- Developed PolicyNav, an AI-powered public policy platform, using Python, Streamlit, RAG, FAISS, and Hugging Face for semantic search, multilingual translation, and intelligent policy question answering.
- Implemented JWT authentication, OTP-based password recovery, document preprocessing, and vector embedding pipelines using FLAN-T5, NLLB, and SQLite to enable secure access and efficient AI-powered document retrieval.
- Containerized and optimized the application with Docker and scalable NLP workflows, integrating knowledge graph visualization, readability analysis, and secure user management for an end-to-end AI solution.

Projects

GreenOps Sentinel | [GitHub](#)

May 2026

- Pioneered an intelligent cost-optimization platform using Java 21 and Spring Boot that proactively identifies and automates idle cloud resource detection, dynamically scaling down underutilized EC2 instances and effectively slashing overall infrastructure costs by 15% while maintaining optimal performance.
- Seamlessly integrated Google Gemini AI via Spring AI to deliver real-time FinOps intelligence and actionable cost-saving recommendations, analyzing performance metrics across 1,000+ EC2 instances daily and enabling data-driven financial decision-making for cloud operations teams.
- Containerized the complete application stack using Docker and operationalized a robust GitHub Actions CI/CD pipeline with automated testing, build, and deployment workflows, accelerating release cycles and reducing deployment time by 30% while ensuring production-grade reliability.

Tech: Java 21, Spring Boot, Spring AI, REST APIs, AWS SDK, EC2, CloudWatch, PostgreSQL, Docker

Email Assistant Writer | [GitHub](#)

Feb 2026

- Built a secure and scalable RESTful backend using Spring Boot that seamlessly integrates Google Gemini API to intelligently automate professional email generation, reducing manual drafting time by 70% for users.
- Designed and executed dynamic prompt-engineering strategies with configurable tone control, supporting 5+ distinct communication styles including formal, casual, persuasive, empathetic, and concise, enabling users to tailor email tone based on recipient and context.
- Architected a modular layered controller-service-repository architecture following SOLID principles, ensuring clean separation of concerns, high maintainability, effortless scalability, and seamless future integration with additional AI models or frontend clients.

Tech: Java, Spring Boot, Gemini API, REST APIs

AI Image Analyzer | [GitHub](#) | [Live](#)

Jun 2025

- Designed an automated image labeling system using AWS Rekognition and AWS Lambda, replacing manual classification with AI-based object detection.
- Managed the backend pipeline using AWS Lambda, S3, and API Gateway, ensuring secure uploads and event-driven processing.
- Deployed and optimized a responsive frontend on Vercel, improving performance and showcasing scalable, cloud-native architecture and automation skills.

Tech: AWS (Rekognition, Lambda, S3, API Gateway), Serverless, React

Certifications

• MongoDB Certified: MongoDB Associate Developer – [MongoDB](#)

Aug 2026

• Microsoft Certified: Azure Administrator Associate – [Microsoft](#)

May 2026

• Oracle Cloud Infrastructure 2025 Certified AI Foundation Associate – [Oracle University](#)
